

Lal Lal Wind Farms

Fact Sheet

Location

Lal Lal Wind Farm is split into two sections of farmland in the Moorabool Shire: The Yendon Section (2km east of Yendon and 17km southeast of Ballarat) and the Elaine Section (2km north of Elaine and 17km south southeast of Ballarat).

Wind Farm Details

Planning Permit:	PL-SP/05/0461/A issued in April 2009 and updated in March 2017
Height:	Maximum of 161m
Minimum Lowest Point of Blade:	20m
Number of Turbines:	60 Turbines in total
Yendon Section:	38 Turbines
Elaine Section:	22 Turbines

The Yendon section of the wind farm will connect to the grid via an existing 66kV distribution line into the Ballarat Area Terminal Station.

The Elaine section will connect directly to the adjacent Elaine Terminal Station.

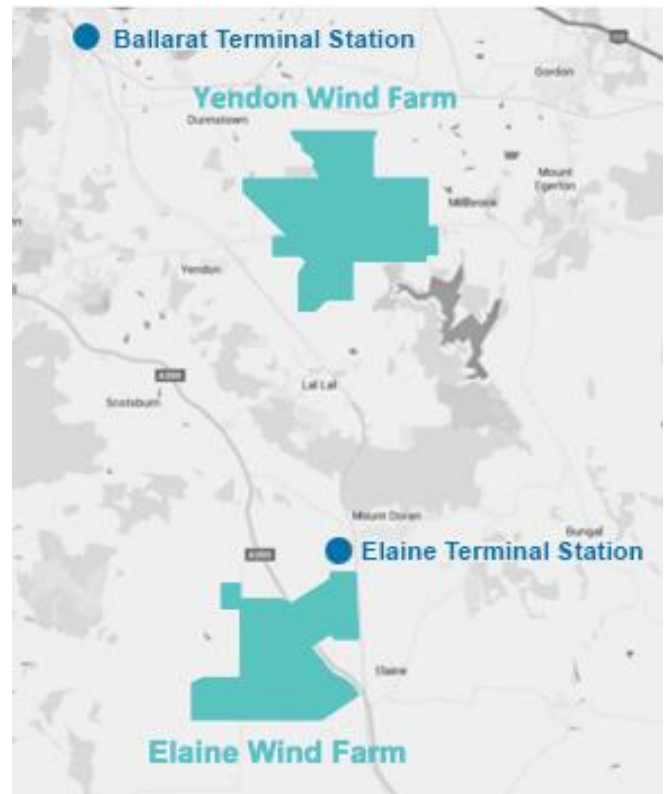

The Lal Lal Wind Farm will have a generating capacity of ~220MW and is expected to generate more than 700 gigawatt hours (GWh) of electricity per annum.

This is enough to power approximately 95,000 homes per year

Employment

The project will generate a number of employment opportunities, particularly during construction.

Links to employment opportunities will be advertised on the Lal Lal Wind Farm website, see www.lallalwindfarms.com.au.

Community Benefit Fund

The wind farm has established a Community Benefit Fund, which provides grants to local community organisations and projects. The focus is on communities within 5km of the wind farm. Once the wind farm is operational the fund will provide \$100,000 (plus CPI) worth of grants annually. Further information on the Community Benefits Fund, including information on the application process, will be available at www.lallalwindfarms.com.au

Noise Management

The Wind Farm noise limit is 40dB La90, 10 mins, or background (LA90, 10 mins) plus 5dB. The noise limits are specified by the Planning Permit.

The noise limit is an ongoing obligation which will be relevant for the life of the wind farm, as required by the Planning Permit.

The Planning Permit specifies a requirement for noise compliance testing, which must be carried out to the satisfaction of the Minister for Planning and be undertaken by a suitability qualified and experienced independent acoustic engineer.

Visual Impact Mitigation and Landscaping

Landscape screening will be offered to all owners of dwellings within 4km of a visible turbine (through the Voluntary Landscape Screening Programme) as well as for the Lal Lal Reserve, Narmbool and St Sava Orthodox Monastery to mitigate the visual impact of turbines.

The voluntary landscape screening programme will be available until 12 months after the commissioning of the last wind turbine. Additional information on the Voluntary Landscaping Screening Programme will be available at www.lallalwindfarms.com.au

Grievance Mechanism

If you have concerns or questions, please contact us on (03) 5421 9999 or email info@lallalwindfarms.com.au.
