

## **Lal Lal Wind Farms, maintenance of local roads in use by the project**

Lal Lal Wind Farms contractors, Zenviron and Vestas have had responsibility to maintain and uphold the condition of the Yendon-Egerton Road, from as per the agreement with the Moorabool Shire Council. This arrangement has been in place through the construction phase of the project. On June 25, 2019 Yendon Egerton Road was inspected and assessed by Moorabool Shire Council. After this assessment Yendon Egerton Road was handed back to Moorabool Shire Council to maintain.

Regular assessments were carried out by Zenviron and Vestas as well as dilapidation surveys conducted at the beginning and the end of construction, on the local roads in use by the project. Maintenance of the road was conducted by both Vestas and Zenviron during the construction phase. Potholes have been repaired and sections of roads have been resurfaced.

This Yendon-Egerton Road is an important throughfare for local residents, travelling public as well as our own employees and contractors. We take our role to maintaining this road seriously as there is nothing more important than people getting where they need to go, safety.
